

# Saubhagya Srivastava

Khalilabad, Uttar Pradesh | **Phone:** 9653039436 | **Email:** saubhagyasrivastav4@gmail.com

## Professional Summary

Aspiring Data Scientist with strong expertise in machine learning, data analysis, and Python programming. Skilled in data visualization, predictive modeling, and statistical analysis. Passionate about using data-driven insights to solve real-world problems. Worked on multiple hands-on projects using Google Colab and Jupyter Notebook.

## Technical Skills

- Programming: Python, SQL
- Machine Learning: Scikit-Learn, TensorFlow
- Data Visualization: Matplotlib, Seaborn
- Tools: Jupyter Notebook, Google Colab, Git, GitHub

## Projects

### *SpaceX Falcon 9 Landing Prediction*

- Analyzed SpaceX launch data to predict successful rocket landings.
- Performed data preprocessing, feature engineering, and model training using Python (Pandas, NumPy, Scikit-Learn).
- Achieved 85% model accuracy using classification algorithms.
- Created interactive visualizations using Plotly and Dash.

## Education

- Senior Secondary (12th) – Mathematics & Computer Science
- IBM Professional Data Science Certificate

## Soft Skills

- Analytical Thinking
- Problem-Solving
- Communication
- Teamwork

## Languages

- English (Fluent)

- Hindi (Native)
